NEREA MONTOYA OLIVARES

EXERCISE 1

The following relational model shows the relations in a movie database.

Load the script “DM_imdb.sql” and create the following queries using aliases whenever necessary:

1. Who are the tallest people? Show name and height.

```
SELECT name, height
FROM people
WHERE height = (SELECT MAX(height) FROM people);
```

name	height
Michael Ritchie	201
Richard Ashton	201

2. Show movies (all fields) with the word "blood" in its title, but only if they last more than one hour and a half.

```
SELECT *
FROM movies
WHERE title LIKE '%blood%' AND duration > 90;
```

id	title	date_published	duration	country	worldwide_gross_income	currency	languages	production_company
